SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

Trade name	: Shell Gadinia S3 40
Product code	: 001G1523

1.2 Relevant identified uses of the substance or mixture and uses advised against

Use of the Sub- stance/Mixture	: Engine oil.	
Uses advised against	: This product must not be used in applications other than those listed in Section 1 without first seeking the advice of the sup- plier.	Э

1.3 Details of the supplier of the safety data sheet

Manufacturer/Supplier	: Shell UK Oil Products Limited Shell Centre London SE1 7NA
Telephone Telefax	United Kingdom : (+44) 08007318888
Contact for Safety Data Sheet	 If you have any enquiries about the content of this SDS please email lubricantSDS@shell.com

1.4 Emergency telephone number

: +44 (0) 20 7934 7778 (This telephone number is available 24 hours per day, 7 days per week)

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Classification (REGULATION (EC) No 1272/2008)

Based on available data this substance / mixture does not meet the classification criteria.

2.2 Label elements

Labelling (REGULATION (EC) No 1272/2008)

Safety data sheet available on request.

Hazard pictograms	:	No Hazard Symbol required
Signal word	:	No signal word

According to EC No 1907/2006 as amended as at the date of this SDS

Shell Gadinia S3 40

Version 1.4	Revision Date: 01.07.2024	SDS Number: 800010028200	Date of last issue: 07.07.2023 Print Date 02.07.2024
Hazar	d statements	Not cla criteria. HEAL ⁻ Not cla ENVIF	ICAL HAZARDS: assified as a physical hazard according to CLP TH HAZARDS: assified as a health hazard under CLP criteria. CONMENTAL HAZARDS: assified as environmental hazard according to
Preca	utionary statements	: Prevention: No pre	ecautionary phrases.
		Response: No pre	ecautionary phrases.
		Storage: No pre	ecautionary phrases.
		Disposal:	ecautionary phrases.

2.3 Other hazards

This mixture does not contain any REACH registered substances that are assessed to be a PBT or a vPvB.

Ecological information: The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

Toxicological information: The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculitis. Used oil may contain harmful impurities. Not classified as flammable but will burn.

SECTION 3: Composition/information on ingredients

3.2 Mixtures Chemica

Chemical nature	:	Highly refined mineral oils and additives. The highly refined mineral oil contains <3% (w/w) DMSO- extract, according to IP346. Classification based on DMSO extract content < 3% (Regula- tion (EC) 1272/2008, Annex VI, Part 3, Note L).
		* contains one or more of the following CAS-numbers (REACH registration numbers): 64742-53-6 (01-2119480375- 34), 64742-54-7 (01-2119484627-25), 64742-55-8 (01-

Components

Chemical name	CAS-No. EC-No. Index-No. Registration number	Classification	Concentration (% w/w)
Interchangeable low viscosity base oil (<20,5 cSt @40°C) *	Not Assigned	Asp. Tox. 1; H304	0 - 90

For explanation of abbreviations see section 16.

SECTION 4: First aid measures

4.1 Description of first aid measures

Protection of first-aiders	:	When administering first aid, ensure that you are wearing the appropriate personal protective equipment according to the incident, injury and surroundings.
If inhaled	:	No treatment necessary under normal conditions of use. If symptoms persist, obtain medical advice.
In case of skin contact	:	Remove contaminated clothing. Flush exposed area with wa- ter and follow by washing with soap if available. If persistent irritation occurs, obtain medical attention.
In case of eye contact	:	Flush eye with copious quantities of water. Remove contact lenses, if present and easy to do. Continue rinsing. If persistent irritation occurs, obtain medical attention.
If swallowed	:	In general no treatment is necessary unless large quantities are swallowed, however, get medical advice.

4.2 Most important symptoms and effects, both acute and delayed

Symptoms	: Oil acne/folliculitis signs and symptoms may include formation
	of black pustules and spots on the skin of exposed areas.
	Ingestion may result in nausea, vomiting and/or diarrhoea.

According to EC No 1907/2006 as amended as at the date of this SDS

Shell Gadinia S3 40

Version 1.4	Revision Date: 01.07.2024		DS Number: 0010028200	Date of last issue: 07.07.2023 Print Date 02.07.2024	
4.3 Indica	tion of any immediate	me	dical attention a	nd special treatment needed	
Treat	ment	:	Notes to doctor Treat symptom		
SECTION	1 5: Firefighting mea	sur	es		
5.1 Exting	uishing media				
Suital	ble extinguishing media	:		bray or fog. Dry chemical powder, carbon diox- rth may be used for small fires only.	
Unsuitable extinguishing media		:	Do not use water in a jet.		
5.2 Specia	al hazards arising fron	n the	e substance or i	nixture	
Specific hazards during fire- fighting : Hazardous combustion products may include: A complex mixture of airborne solid and liquid gases (smoke). Carbon monoxide may be evolved if incomplet occurs. Unidentified organic and inorganic compounds		ure of airborne solid and liquid particulates and de may be evolved if incomplete combustion			
5.3 Advic	e for firefighters				
	al protective equipment efighters	::	: Proper protective equipment including chemical resistant gloves are to be worn; chemical resistant suit is indicated if large contact with spilled product is expected. Self-Contained Breathing Apparatus must be worn when approaching a fire in a confined space. Select fire fighter's clothing approved to relevant Standards (e.g. Europe: EN469).		
Speci ods	fic extinguishing meth-	:		ng measures that are appropriate to local cir- d the surrounding environment.	

6.1 Personal precautions, protective equipment and emergency procedures

Personal precautions	:	6.1.1 For non emergency personnel:Avoid contact with skin and eyes.6.1.2 For emergency responders:Avoid contact with skin and eyes.
6.2 Environmental precautions		
Environmental precautions	:	Use appropriate containment to avoid environmental contami- nation. Prevent from spreading or entering drains, ditches or rivers by using sand, earth, or other appropriate barriers. Local authorities should be advised if significant spillages cannot be contained.

According to EC No 1907/2006 as amended as at the date of this SDS

Shell Gadinia S3 40

Version	Revision Date:	SDS Number:	Date of last issue: 07.07.2023
1.4	01.07.2024	800010028200	Print Date 02.07.2024

6.3 Methods and material for containment and cleaning up

Prevent from spreading by making a barrier with sand, earth or other containment material. Reclaim liquid directly or in an absorbent. Soak up residue with an absorbent such as clay, sand or other suitable material and dispose of properly.	Methods for cleaning up	or other containment material. Reclaim liquid directly or in an absorber Soak up residue with an absorbent such	rrier with sand, earth nt. n as clay, sand or other
---	-------------------------	---	---

6.4 Reference to other sections

For guidance on selection of personal protective equipment see Section 8 of this Safety Data Sheet., For guidance on disposal of spilled material see Section 13 of this Safety Data Sheet.

SECTION 7: Handling and storage

7.1 Precautions for safe handling	
Technical measures :	Use local exhaust ventilation if there is risk of inhalation of vapours, mists or aerosols. Use the information in this data sheet as input to a risk as- sessment of local circumstances to help determine appropri- ate controls for safe handling, storage and disposal of this material.
Advice on safe handling :	Avoid prolonged or repeated contact with skin. Avoid inhaling vapour and/or mists. When handling product in drums, safety footwear should be worn and proper handling equipment should be used. Properly dispose of any contaminated rags or cleaning mate- rials in order to prevent fires.
Product Transfer	: Proper grounding and bonding procedures should be used during all bulk transfer operations to avoid static accumulation.
Hygiene measures :	Exposure to this product should be reduced as low as reason- ably practicable. Reference should be made to the Health and Safety Executive's publication "COSHH Essentials".
7.2 Conditions for safe storage, inc	cluding any incompatibilities
Further information on stor- : age stability	Keep container tightly closed and in a cool, well-ventilated place. Use properly labeled and closable containers. Store at ambient temperature. Refer to section 15 for any additional specific legislation cov- ering the packaging and storage of this product. The storage of this product may be subject to the Control of
	Pollution (Oil Storage) (England) Regulations. Further guid-

office.

ance may be obtained from the local environmental agency

According to EC No 1907/2006 as amended as at the date of this SDS

Shell Gadinia S3 40

Version 1.4	Revision Date: 01.07.2024	SDS Number: 800010028200	Date of last issue: 07.07.2023 Print Date 02.07.2024
Packa	aging material		erial: For containers or container linings, use mild density polyethylene. aterial: PVC.
Conta	iner Advice		containers should not be exposed to high tem- ause of possible risk of distortion.
•	ic end use(s) fic use(s)	: Not applicable	Ð

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Occupational Exposure Limits

Components	CAS-No.	Value type (Form of exposure)	Control parameters	Basis
Oil mist, mineral	Not As- signed	TWA (inhalable fraction)	5 mg/m3	US. ACGIH Threshold Limit Values
Oil mist, mineral		TWA (Inhalable particulate matter)	5 mg/m3	ACGIH

Biological occupational exposure limits

8.2 Exposure controls

Engineering measures

The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances. Appropriate measures include:

Adequate ventilation to control airborne concentrations.

Where material is heated, sprayed or mist formed, there is greater potential for airborne concentrations to be generated.

General Information:

Define procedures for safe handling and maintenance of controls.

Educate and train workers in the hazards and control measures relevant to normal activities associated with this product.

Ensure appropriate selection, testing and maintenance of equipment used to control exposure, e.g. personal protective equipment, local exhaust ventilation.

Drain down system prior to equipment break-in or maintenance.

Retain drain downs in sealed storage pending disposal or subsequent recycle.

Always observe good personal hygiene measures, such as washing hands after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.

According to EC No 1907/2006 as amended as at the date of this SDS

Shell Gadinia S3 40

Version	Revision Date:	SDS Number:	Date of last issue: 07.07.2023

Personal protective equipment

The provided information is made in consideration of the PPE directive (Council Directive 89/686/EEC) and the CEN European Committee for Standardisation (CEN) standards.

Personal protective equipment (PPE) should meet recommended national standards. Check with PPE suppliers.

Eye protection	If material is handled such that it could be splashed into eyes, protective eyewear is recommended. Approved to EU Standard EN166.
Hand protection	
Remarks	Where hand contact with the product may occur the use of gloves approved to relevant standards (e.g. Europe: EN374, US: F739) made from the following materials may provide suitable chemical protection. PVC, neoprene or nitrile rubber gloves Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact, chemical re- sistance of glove material, dexterity. Always seek advice from glove suppliers. Contaminated gloves should be replaced. Personal hygiene is a key element of effective hand care. Gloves must only be worn on clean hands. After using gloves, hands should be washed and dried thoroughly. Appli- cation of a non-perfumed moisturizer is recommended. For continuous contact we recommend gloves with break- through time of more than 240 minutes with preference for > 480 minutes where suitable gloves can be identified. For short-term/splash protection we recommend the same but recognize that suitable gloves offering this level of protection may not be available and in this case a lower breakthrough time maybe acceptable so long as appropriate maintenance and replacement regimes are followed. Glove thickness is not a good predictor of glove resistance to a chemical as it is dependent on the exact composition of the glove material. Glove thickness should be typically greater than 0.35 mm depending on the glove make and model.
Skin and body protection	 Skin protection is not ordinarily required beyond standard work clothes. It is good practice to wear chemical resistant gloves.
Respiratory protection	 No respiratory protection is ordinarily required under normal conditions of use. In accordance with good industrial hygiene practices, precautions should be taken to avoid breathing of material. If engineering controls do not maintain airborne concentrations to a level which is adequate to protect worker health, select respiratory protection equipment suitable for the specific conditions of use and meeting relevant legislation. Check with respiratory protective equipment suppliers.

SECTION 12: Ecological information

12.1 Toxicity

Product:		
Toxicity to fish	:	Remarks: Based on available data, the classification criteria are not met. Practically non toxic: LL/EL/IL50 > 100 mg/l
Toxicity to daphnia and other aquatic invertebrates	:	Remarks: Based on available data, the classification criteria are not met. Practically non toxic: LL/EL/IL50 > 100 mg/l
Toxicity to algae/aquatic plants	:	Remarks: Based on available data, the classification criteria are not met. Practically non toxic: LL/EL/IL50 > 100 mg/l
Toxicity to fish (Chronic tox- icity)	:	Remarks: Based on available data, the classification criteria are not met.
Toxicity to daphnia and other aquatic invertebrates (Chron- ic toxicity)	:	Remarks: Based on available data, the classification criteria are not met.
Toxicity to microorganisms	:	Remarks: Based on available data, the classification criteria are not met.

12.2 Persistence and degradability

Product:

Biodegradability	 Remarks: Not readily biodegradable. Major constituents are inherently biodegradable, but contains components that may persist in the environment. Persistent per IMO criteria. International Oil Pollution Compensation (IOPC) Fund definition: "A non-persistent oil is oil, which, at the time of shipment, consists of hydrocarbon fractions, (a) at least 50% of which, by volume, distills at a temperature of 340°C (645°F) and (b) at least 95% of which, by volume, distils at a temperature of 370°C (700°F) when tested by the ASTM Method D-86/78 or any subsequent revision thereof."

12.3 Bioa	ccumulative potential				
<u>Prod</u> Bioac	uct: ccumulation	: Remarks: Contains components with the potential to bioaccumulat	te.		
12.4 Mobi	ility in soil				
<u>Product:</u> Mobility		: Remarks: Liquid under most environmental conditions., If it enters soil, it will adsorb to soil particles and will not be mobile.			
		Remarks: Floats on water.			
12.5 Resu	Ilts of PBT and vPvB a	sessment			
Prod Asse	<u>uct:</u> ssment	This mixture does not contain any REACH registered sub- stances that are assessed to be a PBT or a vPvB			
12.6 Endo	ocrine disrupting prop	rties			
Prod	<u>uct:</u> ssment	: The substance/mixture does not contain components considered to			
Asse	ssment	The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.			
12.7 Othe	r adverse effects				
Prod	uct:				
Additional ecological infor- mation		Does not have ozone depletion potential, photochemical ozone cre tion potential or global warming potential. Product is a mixture of non-volatile components, which will not be released to air in any significant quantities under normal condition of use.			
		Poorly soluble mixture. Causes physical fouling of aquatic organisms.			
		Unless indicated otherwise, the data presented is representative of the product as a whole, rather than for individual component(s).			
	Mineral oil does not cause chronic toxicity to aquatic organisms at concentrations less than 1 mg/l.	-
